Meghan Markle has only been a member of the royal family for about a little over two years now, but already she's broken a ton of royal rules—both official and unofficial. Sure, some of these guidelines are super extreme and slightly ridiculous (like, let the woman wear all black if she wants to or close the car door she came out of! Hmph!). But still, at the end of the day, the royals have their traditions and they're expected to be followed. Currently re-thinking my dream of being a British royal since that means low-key signing my life away and being looked down upon for wearing a messy bun.
